

The Human-AI Partnership Framework

Where human judgment belongs

Plan-to-Perform

PCF 9.1 — Budgeting, forecasting, cost management & performance — Value Stream Profile

This value stream comprises one APQC PCF process group: 9.1 Perform Planning and Management Accounting — spanning 5 Level 3 processes and 23 Level 4 activities.

At the activity level, this value stream's work breaks down as 11 Transaction activities (rules-based processing suited to automation), 10 Knowledge activities (judgment, synthesis, and interpretation-driven work), and 2 Document activities (content generation). No Decision- or Exception-pattern activity exists within this value stream.

At M3 (HITL Design Intent), the value stream's aggregate human-involvement ratio is 51%, down from a 74% undesigned baseline — a 23-point AI convergence opportunity.

L3 PROCESSES	L4 ACTIVITIES	M1 BASELINE H%	M3 DESIGN INTENT H%	Δ M1 → M3
5	23	74%	51%	-23%

KPIs

Business Impact Metric & Formula (where confirmed)	Source
Budget cycle time <i>Calendar days from budget kickoff to final board/CFO approval</i>	APQC OSB
Forecast accuracy $1 - \text{Forecast} - \text{Actual} \div \text{Actual}$, measured at the revenue or cost-center line	IMA (Institute of Management Accountants)
Planning cost ratio <i>% of total finance operating cost dedicated to planning, budgeting, and forecasting activity</i>	APQC OSB
Rolling forecast variance <i>Variance between the current rolling forecast and the prior-period forecast for the same period, by driver</i>	IMA (Institute of Management Accountants)

Design Narrative

Plan-to-Perform is one of two Strategy-tier value streams in PCF 9.0 rather than Finance's only one — 9.1.1 (Develop and manage financial resources strategy) is CFO's own strategy-formation L3, distinct from Tax Strategy-to-Compliance's separate CFO-owned apex (9.9.1), since both streams open with an Executive-scope strategy step even though Finance's role catalog concentrates domain strategy under a single CFO rather than splitting it across multiple C-suite peers the way IT does across CIO/CISO/CDO. Director of FP&A then holds Accountable for the stream's three core execution L3s — budgeting/forecasting (9.1.2), cost accounting and control (9.1.3), and cost management (9.1.4) — the clear majority of the stream's work. SVP Finance closes the stream with financial-performance evaluation (9.1.5), a review-and-assessment layer that sits above Director of FP&A's execution rather than beneath it. Its steepest AI-absorption opportunity sits in 9.1.2.1 (Develop and maintain budget policies and procedures, Document-pattern, -32 points).

AI Capability Map

Pattern-type distribution across this value stream's activity units. H% figures are the pattern type's standard value at each maturity level, applied consistently across all PCF domains.

Decision <i>Judgment & Authority — gates that stay human by design</i> 0 L4 activities <i>No activities of this pattern in this value stream</i>	Knowledge <i>Synthesis & Interpretation — judgment-driven work</i> 10 L4 activities M1 85% → M3 65%	Document <i>Content Generation — drafting and communication</i> 2 L4 activities M1 72% → M3 40%	Transaction <i>Rules-Based Processing — suited to automation</i> 11 L4 activities M1 60% → M3 35%	Exception <i>Non-Standard Resolution — human-resolved by nature</i> 0 L4 activities <i>No activities of this pattern in this value stream</i>

Process Accountability

Process Accountability	Tier	L3 Processes	L4 Activities
CFO	Executive	9.1.1	1

The Human-AI Partnership Framework

PCF 9.1 — Plan-to-Perform — Value Stream Profile

Process Accountability	Tier	L3 Processes	L4 Activities
Director of FP&A	Managerial	9.1.2, 9.1.3, 9.1.4	15
SVP Finance	Executive	9.1.5	7

Handoff Points

Plan-to-Perform opens with CFO-accountable strategy formation (9.1.1), then hands to Director of FP&A for the stream's core execution work — budgeting/forecasting, cost accounting, and cost management (9.1.2–9.1.4).

Director of FP&A's three L3s move budget policy through periodic budgets/forecasts to variance analysis and cost-driver management, the stream's largest single lane by both L3 and activity count.

SVP Finance closes the stream with financial-performance evaluation (9.1.5) — assessing customer/product profitability and cost-improvement outcomes — before its outputs (approved budget, forecast, performance scorecard) hand off to every other Finance value stream that consumes budget/forecast data downstream.

Governed Decision Points

No Decision- or Exception-pattern activity in this value stream — every step here is Knowledge, Document, Transaction, or Mixed without an embedded Decision/Exception component.
