

PCF 7.4, 7.7, 7.8 — Enable & Govern Value Stream

Process Specification

This document specifies the full L4 activity flow and swim lane ownership for the Enable & Govern value stream, spanning three APQC PCF v8.0 process groups — 7.4 (Manage Employee Relations), 7.7 (Manage Employee Information), and 7.8 (Manage Employee Communication) — 16 Level 3 processes and 22 activity units in total (8 Level 4 activities plus 14 single-leaf L3s).

Process Flow

Full L4 activity sequence, grouped by L3, with swim lane ownership carried from the confirmed Role Accountability RACI (Accountable role at L3 granularity). 14 of this value stream's 16 L3s are single-leaf entries with no L4 sub-breakdown, shown as their own single step; only 7.7.7 and 7.7.8 have real L4 children.

Swim Lane Summary

Swim Lane	Steps Owned	L3 Processes
HRBP Manager	6	7.4.1, 7.4.2, 7.4.3, 7.4.4, 7.8.1, 7.8.3
HRIS Analyst	13	7.7.1, 7.7.3, 7.7.4, 7.7.5, 7.7.6, 7.7.7, 7.7.8
HR Generalist	2	7.7.2, 7.8.2
Director of HR Ops	1	7.4.5

Handoff Points

Enable & Govern is the first value stream in this framework to span multiple PCF L2 groups rather than one, and its swim lanes reflect that structure directly: HRBP Manager owns the case-based, relationship-driven work clustered in 7.4 (labor relations, bargaining, partnerships, grievances) plus the communication bookends in 7.8, while HRIS Analyst owns the systems and data infrastructure that makes up the majority of 7.7 — 13 of this value stream's 22 steps, the largest single lane in the framework so far.

Director of HR Ops holds a single step (7.4.5 Monitor Legal and Regulatory Environment) but sits above both other lanes as the cross-domain governance layer — Consulted or Informed across most of the remaining steps even without direct Accountable ownership of them, reflecting the value stream's own “enable and govern” purpose.

PCF 7.4, 7.7, 7.8 — Enable & Govern Value Stream

Process Specification

HR Generalist's two steps (7.7.2 Manage Employee Inquiry Process, 7.8.2 Conduct Employee Engagement Surveys) form the value stream's operational-delivery layer, distinct from both the case-based work in 7.4 and the systems work in 7.7. 7.8.2 carries forward its Reward-to-Retain assignment unchanged, since APQC names the same underlying activity separately under two different L2 groups — the framework's first confirmed content overlap across value streams.
