

PCF 7.6 — Move-to-Exit Value Stream

HITL Design

This document defines the HITL (Human-in-the-Loop) design for the Move-to-Exit value stream, spanning APQC PCF v8.0 process group 7.6 (Redeploy and Retire Employees) — 3 Level 3 processes and 5 Level 4 activities in total.

At M3 (HITL Design Intent), this value stream's aggregate human-involvement ratio is 52%, down from a 73% undesigned (M1) baseline — a 21-point AI convergence opportunity. Role accountability for every L3 process is confirmed under the framework's reasoned-match methodology, grounded in real APQC L4 activity text against the Organizational Role Taxonomy's documented responsibilities.

HITL Impact Analysis

Human involvement (H%) at M1 (Undesigned) and M3 (HITL Design Intent), by L3 process. Mixed-pattern L3 rows reflect an equal-weighted rollup of their real L4 children.

Process Step (L3)	PCF	Pattern	M1 H%	M3 H%	Δ M1 → M3	Opportunity
Manage Promotion and Demotion Process	7.6.1	Decision	92%	80%	-12%	Single Decision-pattern L3 with no L4 sub-breakdown — promotion/demotion determinations stay human-led at M3, the smallest Δ M1 → M3 in this value stream, consistent with its judgment-and-authority nature.
Manage Separation	7.6.2	Mixed	66%	42%	-24%	Administrative execution — retirement, leave-of-absence, and offboarding processing (Transaction-pattern) — carries the clearest AI-absorption opportunity; outplacement design (Knowledge-pattern) and exit-type risk classification stay human-led.
Relocate Employees and Manage Assignments	7.6.3	Transaction	60%	35%	-25%	Fully Transaction-pattern — expatriate management execution — though Accountable ownership itself is explicitly partial, reflecting a confirmed specialist-role gap rather than a resolved assignment.

AI Capability Map

Pattern-type distribution across all 6 activity units in this value stream (5 L4 activities plus one single-leaf L3). H% figures are the pattern type's standard value at each maturity level, applied consistently across all PCF domains.

DECISION <i>Judgment & Authority — gates that stay human by design</i> 1 L4 activities M1 92% → M3 80%	KNOWLEDGE <i>Synthesis & Interpretation — judgment-driven work</i> 1 L4 activities M1 85% → M3 65%
DOCUMENT <i>Content Generation — drafting and communication</i> 0 L4 activities <i>No activities of this pattern in this value stream</i>	TRANSACTION <i>Rules-Based Processing — suited to automation</i> 4 L4 activities M1 60% → M3 35%
EXCEPTION <i>Non-Standard Resolution — human-resolved by nature</i> 0 L4 activities <i>No activities of this pattern in this value stream</i>	

Role Accountability

Confirmed RACI assignment for every L3 process, reasoned-match methodology. Full assignment reasoning is documented in the companion Role Assignment RACI document for this value stream.

PCF	L3 Process	R	A	C	I
7.6.1	Manage Promotion and Demotion Process	—	HRBP Manager	Compensation & Benefits Manager	—
7.6.2	Manage Separation	HR Generalist	HRBP Manager	Compensation &	Legal*

PCF 7.6 — Move-to-Exit Value Stream

HITL Design

PCF	L3 Process	R	A	C	I
				Benefits Manager	
7.6.3	Relocate Employees and Manage Assignments	HR Generalist (logistics)	HRBP Manager (partial —see gap note)	—	—

**Legal is engaged only on escalation — contested or high-risk terminations — not as a routine participant in every separation. Payroll, IT/Security, and Facilities each run coordinated workstreams against a shared offboarding checklist (final pay, access removal, asset return) outside HR's accountability scope for this L3.*

Design Narrative

Move-to-Exit is the first value stream in this framework where a single role — HR Business Partner Manager — is Accountable for every L3 process, a confirmed structural finding rather than under-differentiation: published offboarding-process literature identifies diffused ownership as the primary failure mode for exit workflows, making concentrated single-role accountability the correct shape here. Human judgment stays most anchored in 7.6.1 (Manage Promotion and Demotion Process, Decision-pattern, the smallest Δ M1 → M3 in the value stream at -12 points). This value stream also produced the framework's first confirmed specialist-role gap: 7.6.3's Accountable assignment is explicitly partial, since International HR Management is a recognized specialist discipline the current role catalog does not name — distinct in kind from Reward-to-Retain's HR/Finance boundary, which was a split between two existing roles rather than the absence of one.
