

PCF 7.5 — Reward-to-Retain Value Stream

Process Specification

This document specifies the full L4 activity flow and swim lane ownership for the Reward-to-Retain value stream, spanning APQC PCF v8.0 process group 7.5 (Reward and Retain Employees) — 5 Level 3 processes and 17 activity units in total (15 Level 4 activities plus two single-leaf L3s).

Process Flow

Full L4 activity sequence, grouped by L3, with swim lane ownership carried from the confirmed Role Accountability RACI (Accountable role at L3 granularity). 7.5.4 and 7.5.5 are single-leaf L3s with no L4 sub-breakdown, shown as their own single step.

Compensation Analyst	4	7.5.2
HR Generalist	3	7.5.3, 7.5.5
HRIS Analyst	1	7.5.4

Handoff Points

The value stream opens with Compensation & Benefits Manager (7.5.1), who owns the largest single L3 in Reward-to-Retain — compensation structure design, administration, and the recurring review cadence all sit in one lane.

7.5.2 Manage and Administer Benefits hands off to Compensation Analyst for fully operational, Transaction-pattern execution — enrollment, claims processing, and reconciliation — with Compensation & Benefits Manager retained as Consulted.

HR Generalist owns two separate pieces of the value stream — employee assistance and retention program delivery (7.5.3) and employee suggestion/research program administration (7.5.5). HRIS Analyst's single step (7.5.4 Administer Payroll) marks the value stream's only genuine cross-functional boundary: HR's accountability there is explicitly scoped to personnel data — vacation/PTO accrual, DEI compliance data — with Finance owning the payroll run and payroll accounting outside this process flow entirely.
