PCF 1.0 — Develop Vision and Strategy

Human involvement H% at each of five HITL maturity levels · L3 Process → L2 Process Group → L1 Domain · Equal-weighted aggregation · Pattern types derived using HITL Verb Derivation Method from PCF Level 4 activities

Maturity Level	M1 Undesigned	M2 Emerging	M3 Defined	M4 Optimized	M5 Leading
Description	No intentional HITL design. AI tools exist but aren't systematically applied.	Tools selectively deployed. AI awareness growing. No systematic design yet.	Intentional HITL design applied. Pattern types classified. Decision rights documented.	AI mature across all patterns. Continuous improvement. Benchmarked against industry.	Maximum AI absorption with principled human oversight. Future state north star.

Pattern Derivation Notes · PCF 1.0

PCF 1.0 is a Knowledge-dominant domain: 18 of 24 L3 processes are classified as Knowledge, reflecting the synthesis, analysis, and strategic design work that defines vision and strategy. Three processes are Decision (establishing vision, mission, and objectives) — where authority and accountability override the analytical work surrounding them. One process is Document (strategy communication) and one is Transaction (executing initiatives).

The M3 (Defined) L1 aggregate of 67% reflects the enduring human judgment requirement in strategic work. Even at M5 (Leading), the 46% H% indicates that AI augments but does not replace human strategic leadership.
