Step · PCF	Pattern · M3%	People	Process	Data · CRUD	Technology
Demand Planning (PCF 4.1.2)					
Manage Demand for Products 4.1.2	Knowledge 65%	Demand Planner, Sales Ops, AI — Forecasting Engine	Develop baseline statistical demand forecasts; collaborate with customers and sales to refine inputs; build consensus forecast across functions; determine available-to-promise; monitor actuals against forecast and revise as needed; measure and report forecast accuracy	C Demand Forecast Demand Planning Platform U Demand Forecast Demand Planning Platform R Customer Order History Demand Planning Platform C Forecast Accuracy Report Demand Planning Platform	Demand Planning Platform — SAP IBP, o9, Blue Yonder — statistical forecasting, consensus workflow AI Forecasting — baseline model generation AI Anomaly Detection — actual-vs-forecast variance flagging Collaboration Portal — customer/sales input capture
Materials Planning (PCF 4.1.3)					
Create Materials Plan 4.1.3	Knowledge 65%	Materials Planner, Supply Planner, AI — Constraint Solver	Generate unconstrained materials plan from the demand forecasts; collaborate with suppliers and contract manufacturers on capacity; identify critical materials and supplier capacity constraints; monitor material specifications; generate the constrained plan balancing supply against demand	C Unconstrained Plan Supply Planning Platform R Demand Forecast Demand Planning Platform R Supplier Capacity Data Supplier Collaboration Portal C Constrained Plan Supply Planning Platform	Supply Planning Platform — SAP APO/IBP, Kinaxis — constraint-based planning AI Constraint Optimization — automated balancing Supplier Collaboration Portal — capacity data exchange
Production Scheduling (PCF 4.1.4)					
Create and Manage Master Production Schedule 4.1.4	Transaction 35%	Production Scheduler, Plant Planner, AI — Scheduling Engine	Model the production network to enable simulation and optimization; create the master production schedule from the constrained materials plan; maintain and adjust the schedule as conditions change	R Constrained Plan Supply Planning Platform C Master Production Schedule MPS/APS Platform U Master Production Schedule MPS/APS Platform	MPS/APS Platform — SAP PP/DS, Kinaxis — schedule generation and maintenance AI Simulation — network modeling and scenario testing AI Schedule Optimization — automated re-sequencing
Distribution Planning (PCF 4.1.5)					
Plan Distribution Requirements 4.1.5	Transaction 35%	Distribution Planner, Logistics Planning, AI — Optimization Engine	Maintain distribution master data; determine finished-goods inventory and storage requirements at destination; calculate requirements and consolidation needs; manage collaborative replenishment planning with partners; calculate and optimize dispatch and load plans; manage capacity utilization and cost of supply	R Master Production Schedule MPS/APS Platform C Distribution Requirements Plan Distribution Planning Platform U Distribution Requirements Plan Distribution Planning Platform C Replenishment Plan Partner Collaboration Portal	Distribution Planning Platform — SAP IBP for Response & Supply, Blue Yonder — requirements calculation, dispatch/load optimization AI Load Optimization — automated consolidation and routing Partner Collaboration Portal — replenishment data exchange
