HITL Design Insight

HITL Design Insight — L2O

6 Decision gates (80% Human at M3) anchor the irreducibly human layer — lead qualification, strategic fit, sales resource allocation, and the internal review/approval checkpoints carry judgment and accountability that stays human by design. 9 Knowledge steps (65% Human at M3) span customer discovery, win-plan development, competitive analysis, and solution design — the largest cluster, and where AI augmentation of research synthesis and proposal drafting offers the clearest opportunity. 4 Transaction steps (35% Human at M3) — lead intake, pipeline tracking, RFP receipt, and staffing lookups — represent rules-based work ready for AI absorption. 3 Document steps (40% Human at M3) cover pricing estimates and the customer-facing quote itself, where AI drafts the structure but human review keeps commercial terms accurate. 1 Exception flow (82% Human) handles win/loss notification outcomes, which still requires human judgment on next steps. L2O aggregate at M3: 61.4% Human / 38.6% AI — reflecting a process where relationship judgment and competitive/solution synthesis remain central even as AI absorbs more of the lead-intake and pricing-mechanics surface.
