

The Human-AI Partnership Framework

Where human judgment belongs

Data-to-Insight

PCF 8.4 — Information & analytics strategy, architecture & lifecycle — Value Stream Profile

This value stream comprises one APQC PCF process group: 8.4 Manage Information — spanning 4 Level 3 processes and 14 Level 4 activities.

At the activity level, this value stream's work breaks down as 6 Transaction activities (rules-based processing suited to automation), 5 Knowledge activities (judgment, synthesis, and interpretation-driven work), 2 Decision activities (judgment-and-authority gates that stay human by design), and 1 Document activity (content generation). No Exception-pattern activity exists within this value stream.

At M3 (HITL Design Intent), the value stream's aggregate human-involvement ratio is 50%, down from a 73% undesigned baseline — a 23-point AI convergence opportunity.

L3 PROCESSES	L4 ACTIVITIES	M1 BASELINE H%	M3 DESIGN INTENT H%	Δ M1 → M3
4	14	73%	50%	-23%

KPIs

Business Impact Metric & Formula (where confirmed)	Source
Information management cost ratio % of IT operating costs (excl. depreciation/amortization) dedicated to Manage Enterprise Information	APQC OSB
Data Quality Score Data assets passing defined quality-dimension checks (accuracy, completeness, consistency, timeliness, validity, uniqueness) ÷ total assets assessed, by domain	DAMA-DMBOK
Data stewardship coverage Critical data assets with a documented, assigned owner or steward ÷ total critical data assets	DAMA-DMBOK

Design Narrative

Data-to-Insight follows the same apex pattern as IT Vision-to-Strategy and Risk-to-Resilience: 8.4.1 (Define business information and analytics strategy) is Chief Data Officer's own strategy-formation L3, while Director of Data & Analytics holds Accountable for the remaining 3 L3s — information architecture (8.4.2), lifecycle planning and control (8.4.3), and ongoing information management (8.4.4). Data Engineer carries Responsible across all 4 L3s without ever holding Accountable, the cleanest single-role execution lane of any PCF 8.0 value stream. This is also the only value stream where Enterprise Architect appears solely as Consulted rather than Accountable anywhere — information architecture here is Director of Data & Analytics' domain, with Enterprise Architect's involvement scoped to alignment with the broader enterprise architecture rather than ownership. Its steepest AI-absorption opportunity sits in 8.4.3.1 (Define and maintain enterprise information policies, standards, and procedures, Document-pattern, -32 points).

AI Capability Map

Pattern-type distribution across this value stream's activity units. H% figures are the pattern type's standard value at each maturity level, applied consistently across all PCF domains.

Decision Judgment & Authority — gates that stay human by design 2 L4 activities M1 92% → M3 80%	Knowledge Synthesis & Interpretation — judgment-driven work 5 L4 activities M1 85% → M3 65%	Document Content Generation — drafting and communication 1 L4 activities M1 72% → M3 40%	Transaction Rules-Based Processing — suited to automation 6 L4 activities M1 60% → M3 35%	Exception Non-Standard Resolution — human-resolved by nature 0 L4 activities No activities of this pattern in this value stream
--	--	---	--	--

Process Accountability

Process Accountability	Tier	L3 Processes	L4 Activities
Chief Data Officer	Executive	8.4.1	3
Director of Data & Analytics	Managerial	8.4.2, 8.4.3, 8.4.4	11

Handoff Points

The stream opens with Chief Data Officer-accountable strategy formation (8.4.1), then hands to Director of Data & Analytics for the remaining three L3s: information architecture (8.4.2), lifecycle planning and control (8.4.3), and ongoing information management (8.4.4).

Data Engineer carries Responsible across all four L3s, the cleanest single-execution-role lane in PCF 8.0 — the handoff from Director of Data & Analytics to Data Engineer is consistent throughout rather than shifting by L3.

Governed Decision Points

Every Decision/Exception-pattern activity in the value stream, including those embedded inside Mixed-labeled steps.

PCF	Decision	Authority	Impact	Escalates To	Trigger
8.4.1.1	Establish data, information, and analytic objectives	Chief Data Officer	Strategic — sets direction for the domain's information/analytics agenda	CEO / Board (outside the IT role catalog)	Objectives require enterprise-level budget commitment or conflict with board-approved data strategy
8.4.2.4	Establish data ownership and stewardship responsibilities	Director of Data & Analytics	Operational + Governance — assigns accountability for data domains	Chief Data Officer (Executive)	Ownership assignment spans multiple business units or is contested between data domains
