

PCF 7.0 — Recruit-to-Hire Value Stream

Role Assignment RACI — Reasoned-Match Pilot

This is a pilot application of the framework's reasoned-match role-assignment methodology to PCF 7.0's Recruit-to-Hire value stream (7.1.1–7.2.5). Unlike the extraction methodology used in the PCF 7.0 Governance RACI proof-of-concept — which pulled Responsible/Consulted/Informed directly from existing live-navigator People-column data — this methodology assigns roles by matching each L3 process's actual APQC L4 activity text against the Organizational Role Taxonomy's role responsibility text. It was developed because two of this value stream's nine L3 processes (7.1.3, 7.1.4) have zero corresponding data in the H2R Navigator, proving the navigator cannot serve as a complete source of truth for role assignment. This is a lower-confidence methodology than extraction and must be labeled as such wherever it is used.

Standing methodology rule: every assignment below is grounded in the real L4 activity text pulled from the APQC PCF v8.0 source (Excel), never inferred from L3 names or titles alone. Where APQC's L4 granularity and the Taxonomy's role catalog together left no clean single-role fit (7.1.2, 7.1.4), two published external references — SAP's HCM Organizational Management structure and SHRM's HR Competency Model — were consulted as an overlay check. Neither is a titled-role responsibility catalog (SAP models system objects; SHRM models competency domains, not job titles), so neither could resolve the granularity directly — but SHRM independently confirmed the functional domain boundaries used below are recognized industry-wide, not invented for this pilot.

PCF	L3 Process	R — Responsible	A — Accountable	C — Consulted	I — Informed
7.1.1	Develop HR Strategy	HRBP Manager · Director of HR Ops	CHRO	Director of TA	All Managerial-tier
7.1.2	Workforce Planning/Policies	Comp & Benefits Mgr · HRBP Mgr · Dir. of L&D · HR Generalist	VP People & Culture	CHRO	Director of TA · Dir. of HR Ops
7.1.3	Monitor/Update HR Strategies	HRBP Manager · Director of HR Ops	VP People & Culture	CHRO	All Managerial-tier
7.1.4	Competency Management Models	HRBP Manager	VP People & Culture	Dir. of L&D · Comp & Benefits Mgr	CHRO
7.2.1	Manage Requisitions	HR Generalist · Recruiter	HRBP Manager	Director of TA	Hiring Managers*
7.2.2	Recruit/Source Candidates	HR Generalist (referrals)	Recruiter	Director of TA	HRBP Manager
7.2.3	Screen/Select Candidates	Hiring Managers*	Recruiter	Director of TA	HRBP Manager
7.2.4	Manage New Hire/Rehire	Comp & Benefits Mgr (offer terms)	Recruiter	Director of TA	HRIS Analyst
7.2.5	Manage Applicant Information	Recruiter (data entry)	HRIS Analyst	—	Director of HR Ops

*Hiring Managers appear in the underlying APQC L4 text (interview panels, requisition notification, candidate selection) but are not a titled role in the current Organizational Role Taxonomy catalog. Logged here as an external participant rather than force-fit to an existing title, pending a decision on whether to formalize an external-participant category.

PCF 7.0 — Recruit-to-Hire Value Stream

Role Assignment RACI — Reasoned-Match Pilot

Accountable Assignment — Reasoning

7.1.1 Develop HR Strategy

All eight L4 activities (needs identification, role/structure/delivery-model determination, cost determination, HR measures, strategy communication, HR systems/technology strategy, employer branding, employee experience design) are foundational, organization-wide design work — none is specialist sub-function execution. CHRO is the only catalog role positioned above the functional Managerial tier to own architecture at this scope. HRBP Manager and Director of HR Ops are Responsible for the underlying analysis (needs identification, cost determination) that CHRO is accountable for as an output.

7.1.2 Workforce Planning/Policies

Of 16 L4 activities, only one (7.1.2.11, Administer HR policies) is operational; the remaining 15 split into recognizable specialist domains — compensation/rewards strategy, succession/leadership programs, DEI, program design, policy creation, workforce models, job architecture. SHRM's published competency model independently names several of these as distinct professional domains (Workforce Planning and Employment; Compensation and Benefits; HR Development), confirming the cluster boundaries are not arbitrary. No single Managerial-tier role in the catalog owns this breadth, so VP People & Culture is Accountable (matching the strategic-design tenor of 15 of 16 L4s) while Responsible is distributed by cluster across Compensation & Benefits Manager, HR Business Partner Manager, Director of L&D, and HR Generalist.

7.1.3 Monitor/Update HR Strategies

All four L4 activities (measure realization of HR objectives, measure HR's contribution to business strategy, communicate plan updates, review/revise plans) are measurement-and-revision cadence work — categorically distinct from 7.1.1's design work, confirmed directly by the L4 text rather than inferred from the L3 name. This is standing stewardship one tier below the strategy author, which is VP People & Culture's natural position relative to CHRO.

7.1.4 Competency Management Models

Single leaf L3 with no L4 children. Its description centers on integrating HR planning with business planning and assessing organizational capacity against goals — capability-architecture work at the intersection of HR strategy and business planning, closer to 7.1.3's stewardship register than to Learning & Development's typical remit of skills-delivery execution. Reassigned from an initial Director of L&D placement to VP People & Culture on this basis; Director of L&D remains Consulted since competency models still touch L&D's domain.

7.2.1 Manage Requisitions

The seven L4 activities span a real range, from strategic alignment ("Align staffing plan to work force plan and business unit strategies/resource needs") down to routine administration (open/post/modify requisitions, notify hiring manager, manage dates). The strategic-alignment activity is HR Business Partner Manager's defining function — bridging business-unit strategy into HR delivery — rather than Director of Talent Acquisition's, who sits at the Value Stream Owner aggregation layer above individual L3 ownership. HR Generalist and Recruiter are Responsible for the administrative-layer execution.

7.2.2 Recruit/Source Candidates

All six L4 activities (channel determination, recruiting events, candidate pool development, vendor management, referral programs, channel management) are uniformly hands-on sourcing execution with no strategic-design or administrative content mixed in — the cleanest single-role match in the value stream.

7.2.3 Screen/Select Candidates

All four L4 activities (selection tools, interviewing, testing, select/reject) continue the same practitioner workflow as 7.2.2. Hiring managers appear implicitly in the L4 description (technical and hiring-manager interviews are named) but are not a role in the current catalog — flagged as an external participant rather than force-fit to an existing title.

7.2.4 Manage New Hire/Rehire

All three L4 activities (draw up offer, negotiate offer, hire candidate) are the Recruiter's process closing out, not a handoff to a different role. Compensation & Benefits Manager is Responsible for offer-terms content — comp bands, negotiable levers — as subject-matter authority, even though the Recruiter runs the conversation with the candidate.

7.2.5 Manage Applicant Information

All four L4 activities (background information, applicant records, tracking, archiving) are systems-of-record and data-management work, categorically different in nature from 7.2.2–7.2.4's people-facing activities. Confirms the split between performing recruiting and recording recruiting as a real distinction present in the source data, not an artificial one.

Cross-Cutting Pattern

PCF 7.0 — Recruit-to-Hire Value Stream

Role Assignment RACI — Reasoned-Match Pilot

The nine L3 processes resolve into three accountability bands rather than a flat list: Executive strategy and stewardship (7.1.1–7.1.4, all CHRO or VP People & Culture), Managerial process-alignment (7.2.1, HR Business Partner Manager), and Operational execution (7.2.2–7.2.5, Recruiter or HRIS Analyst). This shape emerged from the L4-grounded matching itself rather than being imposed on it, and is worth carrying forward as a structural hypothesis when this methodology extends to the remaining four PCF 7.0 value streams.

What This Proves / Doesn't Prove

Proves: a full RACI structure can be built for a value stream even where the corresponding live process navigator has zero coverage, by grounding every assignment in real APQC L4 activity text rather than in navigator data or L3 names alone. Two published external references were checked against the two hardest cases (7.1.2, 7.1.4) and neither contradicted the reasoning — SHRM's competency model positively reinforced it.

Doesn't prove: that this methodology carries the same confidence as extraction. Every Accountable assignment here is a judgment call informed by L4 text, not a fact pulled from an existing system of record, and two of nine L3s (7.1.2, 7.1.4) required overlay reasoning beyond APQC and the Taxonomy alone because no external catalog — APQC, SAP, or SHRM — publishes role/title-level responsibility text at this granularity. Extending this pilot to the other four PCF 7.0 value streams, and eventually to domains without any existing navigator at all, will surface more cases like 7.1.2/7.1.4 and should be expected to, not treated as pilot-specific noise.
