

The Human-AI Partnership Framework

Where human judgment belongs

IT Vision-to-Strategy

PCF 8.2 — Set IT & architecture direction — Value Stream Profile

This value stream comprises one APQC PCF process group: 8.2 Develop and Manage IT Business Strategy — spanning 7 Level 3 processes and 43 Level 4 activities.

At the activity level, this value stream's work breaks down as 30 Knowledge activities (judgment, synthesis, and interpretation-driven work), 7 Transaction activities (rules-based processing suited to automation), 4 Document activities (content generation), and 2 Decision activities (judgment-and-authority gates that stay human by design). No Exception-pattern activity exists within this value stream.

At M3 (HITL Design Intent), the value stream's aggregate human-involvement ratio is 59%, down from an 81% undesigned baseline — a 22-point AI convergence opportunity.

L3 PROCESSES	L4 ACTIVITIES	M1 BASELINE H%	M3 DESIGN INTENT H%	Δ M1 → M3
7	43	81%	59%	-22%

KPIs

Business Impact Metric & Formula (where confirmed)	Source
IT strategy cost ratio % of IT operating costs (excl. depreciation/amortization) dedicated to Develop and Manage IT Business Strategy	APQC OSB
IT-business alignment % of IT projects/initiatives formally validated against approved business technology strategy	COBIT
Portfolio investment balance % of total IT spend classified as Grow/Transform vs. Run, tracked at each portfolio review	Gartner
Architecture Compliance Rate IT initiatives passing Architecture Compliance review (first submission or approved waiver) ÷ total initiatives reviewed	TOGAF

Design Narrative

IT Vision-to-Strategy is one of three Executive-Accountable apex streams in PCF 8.0 rather than the domain's only one — 8.2.1 (Define business technology and governance strategy) is CIO's own strategy-formation L3, distinct from CISO's security-strategy apex (Risk-to-Resilience, 8.3.1) and CDO's data-strategy apex (Data-to-Insight, 8.4.1), since IT's taxonomy gives each Executive role its own explicit governance mandate rather than concentrating all domain strategy under one CHRO-equivalent as HR does. IT Director then holds Accountable for the stream's cross-cutting management activities — portfolio strategy (8.2.2), IT management-system control (8.2.5), and value-portfolio management (8.2.6) — while Enterprise Architect owns the two most technically specialized L3s, enterprise architecture itself (8.2.3) and technology innovation (8.2.7). IT Service Manager's single L3 (8.2.4, ITSM strategy) is the stream's one specialist-owned exception to the IT Director/Enterprise Architect split. Its steepest AI-absorption opportunity sits in 8.2.1.5 (Articulate IT alignment principles, Document-pattern, -32 points).

AI Capability Map

Pattern-type distribution across this value stream's activity units. H% figures are the pattern type's standard value at each maturity level, applied consistently across all PCF domains.

Decision Judgment & Authority — gates that stay human by design 2 L4 activities M1 92% → M3 80%	Knowledge Synthesis & Interpretation — judgment-driven work 30 L4 activities M1 85% → M3 65%	Document Content Generation — drafting and communication 4 L4 activities M1 72% → M3 40%	Transaction Rules-Based Processing — suited to automation 7 L4 activities M1 60% → M3 35%	Exception Non-Standard Resolution — human-resolved by nature 0 L4 activities No activities of this pattern in this value stream

Process Accountability

The Human-AI Partnership Framework

PCF 8.2 — IT Vision-to-Strategy — Value Stream Profile

Process Accountability	Tier	L3 Processes	L4 Activities
CIO	Executive	8.2.1	6
IT Director	Managerial	8.2.2, 8.2.5, 8.2.6	19
Enterprise Architect	Managerial	8.2.3, 8.2.7	11
IT Service Manager	Managerial	8.2.4	7

Handoff Points

IT Vision-to-Strategy opens with CIO-accountable strategy formation (8.2.1), then hands to IT Director for portfolio strategy, management-system control, and value-portfolio management (8.2.2, 8.2.5, 8.2.6) — the stream's cross-cutting governance layer.

Enterprise Architect picks up the stream's most technically specialized work: enterprise architecture definition (8.2.3) and technology innovation (8.2.7), both requiring deep technical judgment distinct from IT Director's portfolio-management lane.

IT Service Manager holds a single adjacent step — ITSM strategy definition (8.2.4) — closing the stream before its outputs (approved technology strategy, portfolio priorities, architecture standards) hand off to every operational stream in the domain.

Governed Decision Points

Every Decision/Exception-pattern activity in the value stream, including those embedded inside Mixed-labeled steps.

PCF	Decision	Authority	Impact	Escalates To	Trigger
8.2.2.4	Prioritize IT projects	IT Director	Financial + Strategic — shapes IT investment allocation	CIO (Executive)	Project competes for constrained budget/resources across multiple business units or exceeds standard portfolio threshold
8.2.6.4	Determine and implement IT portfolio adjustments	IT Director	Financial — reallocation of committed IT investment	CIO (Executive)	Adjustment requires reallocating previously approved budget or discontinuing a committed initiative
