

The Human-AI Partnership Framework

Where human judgment belongs

Support-to-Resolve

PCF 8.7.3, 8.7.6, 8.7.7, 8.7.8 — Run operations & resolve user issues — Value Stream Profile

This value stream comprises 4 Level 3 processes drawn from APQC PCF process group 8.7 Create and Manage Support Services/Solutions — the execution-facing half of that group — spanning 21 Level 4 activities.

At the activity level, this value stream's work breaks down as 15 Transaction activities (rules-based processing suited to automation), 5 Exception activities (non-standard resolution, the highest concentration of any PCF 8.0 value stream), and 1 Knowledge activity. No Decision- or Document-pattern activity exists within this value stream.

At M3 (HITL Design Intent), the value stream's aggregate human-involvement ratio is 51%, down from a 73% undesigned baseline — a 22-point AI convergence opportunity.

L3 PROCESSES	L4 ACTIVITIES	M1 BASELINE H%	M3 DESIGN INTENT H%	Δ M1 → M3
4	21	73%	51%	-22%

KPIs

Business Impact Metric & Formula (where confirmed)	Source
First-Touch Resolution Rate <i>Support tickets resolved at first contact ÷ total tickets</i>	ITIL
System uptime / availability <i>Actual system uptime ÷ target SLA uptime, measured continuously</i>	ITIL
MTTR (operational incidents) <i>Average time to resolve unplanned operational issues, from detection to restoration</i>	ITIL

Design Narrative

Support-to-Resolve is the execution-facing half of the former Request-to-Fulfill stream: Systems Administrator holds Accountable for 3 of 4 L3s — delivery control (8.7.3), delivery operations (8.7.6), and infrastructure resource administration (8.7.7) — direct hands-on infrastructure work, with Network Engineer carrying Responsible on two of those three. IT Support Specialist closes the stream with end-user support (8.7.8), the domain's Tier 1/2 support lane. This value stream carries PCF 8.0's highest concentration of Exception-pattern work (5 of 21 activities, all clustered in unplanned-issue response and IT support triage/escalation/resolution) and zero Knowledge- or Document-pattern content beyond a single activity — the most operationally procedural value stream in the domain. Its steepest AI-absorption opportunity sits in 8.7.6.1 (Operate and monitor online systems, Transaction-pattern, -25 points).

AI Capability Map

Pattern-type distribution across this value stream's activity units. H% figures are the pattern type's standard value at each maturity level, applied consistently across all PCF domains.

Decision <i>Judgment & Authority — gates that stay human by design</i> 0 L4 activities <i>No activities of this pattern in this value stream</i>	Knowledge <i>Synthesis & Interpretation — judgment-driven work</i> 1 L4 activities M1 85% → M3 65%	Document <i>Content Generation — drafting and communication</i> 0 L4 activities <i>No activities of this pattern in this value stream</i>	Transaction <i>Rules-Based Processing — suited to automation</i> 15 L4 activities M1 60% → M3 35%	Exception <i>Non-Standard Resolution — human-resolved by nature</i> 5 L4 activities M1 95% → M3 82%

Process Accountability

Process Accountability	Tier	L3 Processes	L4 Activities
Systems Administrator	Operational	8.7.3, 8.7.6, 8.7.7	15
IT Support Specialist	Operational	8.7.8	6

Handoff Points

The Human-AI Partnership Framework

PCF 8.7.3, 8.7.6, 8.7.7, 8.7.8 — Support-to-Resolve — Value Stream Profile

The stream opens with Systems Administrator on delivery control (8.7.3), then continues through delivery operations (8.7.6) and infrastructure resource administration (8.7.7) — Network Engineer carries Responsible on the latter two, a consistent Managerial-tier-Accountable/Operational-tier-execution pattern.

It closes with IT Support Specialist on end-user support (8.7.8) — triage, escalation, and resolution of IT issues and requests, the domain's Tier 1/2 support lane and the stream's highest concentration of Exception-pattern work.

Governed Decision Points

Every Decision/Exception-pattern activity in the value stream, including those embedded inside Mixed-labeled steps.

PCF	Decision	Authority	Impact	Escalates To	Trigger
8.7.6.5	Respond to unplanned operational issues	Systems Administrator	Operational — direct service continuity risk	Director of Cybersecurity (Managerial) if security-related, otherwise IT Director	Issue affects a business-critical system or cannot be resolved within standard operational procedures
8.7.6.8	Manage IT infrastructure/data recovery	Systems Administrator	Operational + Data integrity — direct business continuity risk	IT Director (Managerial)	Recovery scope exceeds standard backup/restore procedures or involves a business-critical data asset
8.7.8.1	Triage IT issues/requests	IT Support Specialist	Operational	Systems Administrator / Network Engineer (Operational)	Issue cannot be classified or resolved within standard Tier 1/2 support procedures
8.7.8.4	Escalate IT requests	IT Support Specialist	Operational	Systems Administrator / Director of Cybersecurity (as applicable)	Request exceeds Tier 1/2 support authority or involves a security-related issue
8.7.8.5	Resolve IT issues/requests	IT Support Specialist	Operational	Systems Administrator (Operational)	Resolution requires infrastructure-level access or change beyond standard support tooling
