CRUD Matrix — Data Entities & Systems of Record

8.0 — Manage Information Technology (IT) · Domain-wide, all 7 process groups

This page maps every data entity each process Creates, Reads, Updates, or Deletes, and the system of record it lives in, for all of 8.0 (Manage Information Technology (IT)) — 7 process groups, 44 Level 3 processes, and 251 Level 4 activities in total. It's the Data View's answer to a different question than Process View (how much stays human) or People View (who's accountable): what actually gets touched, and where does it live.

CRUD assignment in this framework is confirmed at L3 process granularity and inherited by L4 children, the same convention already used for RACI — never assigned independently per L4. Coverage is real, not exhaustive: only L3s with a confirmed CRUD assignment show entries; the rest show “.”, an honest gap rather than an inferred one. 44 of 44 L3 processes have confirmed CRUD data so far.

CRUD Matrix

C = Create · R = Read · U = Update · D = Delete · Full L1 → L2 → L3 → L4 hierarchy, CRUD carried from L3 to its L4 children

PCF	Activity	Pattern · M3 H%	C — Create	R — Read	U — Update	D — Delete
