

The Human-AI Partnership Framework

Where human judgment belongs

Delivery-to-Plan

PCF 8.7.1, 8.7.2, 8.7.4, 8.7.5 — Service delivery & infrastructure planning — Value Stream Profile

This value stream comprises 4 Level 3 processes drawn from APQC PCF process group 8.7 Create and Manage Support Services/Solutions — the planning-facing half of that group — spanning 26 Level 4 activities.

At the activity level, this value stream's work breaks down as 18 Knowledge activities (judgment, synthesis, and interpretation-driven work), 6 Transaction activities (rules-based processing suited to automation), 1 Document activity, and 1 Exception activity. No Decision-pattern activity exists within this value stream.

At M3 (HITL Design Intent), the value stream's aggregate human-involvement ratio is 59%, down from an 80% undesigned baseline — a 21-point AI convergence opportunity.

L3 PROCESSES	L4 ACTIVITIES	M1 BASELINE H%	M3 DESIGN INTENT H%	Δ M1 → M3
4	26	80%	59%	-21%

KPIs

Business Impact Metric & Formula (where confirmed)	Source
IT support cost ratio % of IT operating costs (excl. depreciation/amortization) dedicated to Support Services/Solutions	APQC OSB
Capacity forecast accuracy Actual resource utilization vs. forecasted capacity plan, tracked per planning cycle	ITIL
Continuity plan completion rate Scheduled backup/continuity plans completed and verified on schedule ÷ total scheduled plans	ITIL

Design Narrative

Delivery-to-Plan is the planning-facing half of the former Request-to-Fulfill stream, carved out specifically because its owner profile didn't match Support-to-Resolve's execution-heavy lane. IT Service Manager holds Accountable for 3 of 4 L3s — delivery strategy (8.7.1), support strategy (8.7.2), and service support planning (8.7.5) — while IT Director owns the one L3 requiring budget-level judgment, infrastructure resource planning (8.7.4), where Enterprise Architect appears as Consulted rather than Accountable. This is the only PCF 8.0 value stream with zero Decision-pattern activity — its work is concentrated in Knowledge-pattern strategy and planning content rather than formal approval gates. Its steepest AI-absorption opportunity sits in 8.7.5.5 (Communicate service support needs, Document-pattern, -32 points).

AI Capability Map

Pattern-type distribution across this value stream's activity units. H% figures are the pattern type's standard value at each maturity level, applied consistently across all PCF domains.

Decision Judgment & Authority — gates that stay human by design 0 L4 activities No activities of this pattern in this value stream	Knowledge Synthesis & Interpretation — judgment-driven work 18 L4 activities M1 85% → M3 65%	Document Content Generation — drafting and communication 1 L4 activities M1 72% → M3 40%	Transaction Rules-Based Processing — suited to automation 6 L4 activities M1 60% → M3 35%	Exception Non-Standard Resolution — human-resolved by nature 1 L4 activities M1 95% → M3 82%
---	---	---	--	---

Process Accountability

Process Accountability	Tier	L3 Processes	L4 Activities
IT Service Manager	Managerial	8.7.1, 8.7.2, 8.7.5	21
IT Director	Managerial	8.7.4	5

Handoff Points

The Human-AI Partnership Framework

PCF 8.7.1, 8.7.2, 8.7.4, 8.7.5 — Delivery-to-Plan — Value Stream Profile

The stream opens with IT Service Manager on delivery strategy and support strategy (8.7.1, 8.7.2), then hands to IT Director for infrastructure resource planning (8.7.4) — the one L3 requiring budget-level judgment, with Enterprise Architect Consulted.

IT Service Manager closes the stream with service support planning (8.7.5), the design-and-planning bookend to 8.7.1's opening strategy work.

Governed Decision Points

Every Decision/Exception-pattern activity in the value stream, including those embedded inside Mixed-labeled steps.

PCF	Decision	Authority	Impact	Escalates To	Trigger
8.7.5.9	Triage IT service delivery incidents	IT Service Manager	Operational	IT Director (Managerial)	Incident affects service delivery planning commitments or recurs across multiple support cycles
