PCF 7.0 — Enable & Govern Value Stream

Role Assignment RACI — Reasoned-Match Methodology (Final)

This document defines role accountability for PCF 7.0's Enable & Govern value stream, which spans three underlying PCF groups — 7.4 (Manage Employee Relations), 7.7 (Manage Employee Information and Analytics), and 7.8 (Manage Employee Communication) — rather than a single contiguous PCF group as in prior value streams. Each of the 16 L3 processes is assigned a single Accountable role, with supporting Responsible, Consulted, and Informed roles, following standard RACI convention. Every assignment is grounded directly in APQC's Process Classification Framework v8.0 activity-level (L4) detail matched against the Organizational Role Taxonomy's documented role responsibilities. No assignment is inferred from process names or titles alone.

One L3 (7.8.2, Conduct Employee Engagement Surveys) is functionally identical to the Reward-to-Retain value stream's 7.5.5 — APQC names the same activity separately under two different L2 groups — and carries the same role assignment forward for consistency. Legal's role varies by context within this value stream: it is a Consulted, ongoing participant in labor relations and bargaining work (7.4.1, 7.4.2, 7.4.5), reflecting the standing legal weight of that subject matter, but remains Informed-only on escalation for routine grievances (7.4.4), consistent with the escalation-only pattern established for separations in Move-to-Exit.

Every assignment below, including the Value Stream Owner selection for a value stream spanning three PCF groups, was reviewed and confirmed through direct subject-matter review rather than accepted as a first-pass result.

Value Stream Owner: Director of HR Operations (Managerial tier). This value stream's ownership question was closer than in prior value streams: HR Business Partner Manager is Accountable for the largest number of individual L3s, but that ownership is concentrated in two of the three underlying PCF groups. Director of HR Operations has the broader cross-domain claim — directly Accountable for 7.4.5, and positioned above HRIS Analyst's ownership of the majority of PCF 7.7's L3s — making it the more representative Value Stream Owner for a group whose purpose is enabling infrastructure and governance across the whole HR function, rather than a single people-program delivery area.

PCF	L3 Process	R — Responsible	A — Accountable	C — Consulted	I — Informed
7.4.1	Manage Labor Relations	—	HRBP Manager	Legal	Director of HR Ops
7.4.2	Manage Collective Bargaining Process	—	HRBP Manager	Legal	Director of HR Ops
7.4.3	Manage Labor Management Partnerships	—	HRBP Manager	—	Director of HR Ops
7.4.4	Manage Employee Grievances	—	HRBP Manager	—	Legal* · Director of HR Ops
7.4.5	Monitor Legal and Regulatory Environment	—	Director of HR Ops	Legal	CHRO
7.7.1	Manage Reporting Processes	—	HRIS Analyst	—	Director of HR Ops
7.7.2	Manage Employee Inquiry Process	—	HR Generalist	HRBP Manager	—
7.7.3	Manage and Maintain Employee Data	—	HRIS Analyst	—	—
7.7.4	Manage HR Information Systems	—	HRIS Analyst	—	Director of HR Ops
7.7.5	Develop/Manage Employee Measures	—	HRIS Analyst	Director of HR Ops	—
7.7.6	Develop/Manage Time and Attendance Systems	—	HRIS Analyst	—	—
7.7.7	Develop Workforce Analytics	—	HRIS Analyst	Director of HR Ops	—
7.7.8	Implement Workforce Analytics	—	HRIS Analyst	—	Director of HR Ops
7.8.1	Develop Employee Communication Plan	—	HRBP Manager	Director of HR Ops	—
7.8.2	Conduct Employee Engagement Surveys	HRIS Analyst (data/survey tooling)	HR Generalist	—	HRBP Manager
7.8.3	Deliver Employee Communications	HR Generalist (delivery execution)	HRBP Manager	—	—

*Legal is engaged only on escalation for contested or high-risk grievances under 7.4.4, distinct from its Consulted role in 7.4.1, 7.4.2, and 7.4.5, where legal involvement is a standing part of the process rather than an exception case.

PCF 7.0 — Enable & Govern Value Stream

Role Assignment RACI — Reasoned-Match Methodology (Final)

Accountable Assignment — Reasoning

PCF 7.4 — Manage Employee Relations

7.4.1 Manage Labor Relations

Single leaf L3. Its description functions as an umbrella covering collective bargaining, labor-management relationships, and employee grievances — the same content that 7.4.2–7.4.4 then break into separate L3s. Accountable is HR Business Partner Manager across this whole cluster, since the four L3s function as one tightly coupled labor-relations discipline distinguished mainly by process granularity rather than distinct ownership. Legal is Consulted rather than Informed-only here, since collective bargaining and labor relationships carry direct legal weight on an ongoing basis, not just on escalation.

7.4.2 Manage Collective Bargaining Process

Single leaf L3 covering negotiations between employer and employee groups to determine employment conditions. Accountable is HR Business Partner Manager, consistent with the 7.4.1 cluster. Legal remains Consulted: bargaining agreements are legally binding documents, so proactive legal involvement is standard practice rather than an exception case.

7.4.3 Manage Labor Management Partnerships

Single leaf L3 covering ongoing two-way labor-management relationship stewardship. Accountable is HR Business Partner Manager, consistent with the cluster; no Legal involvement is warranted at the relationship-stewardship level the way it is for bargaining agreements themselves.

7.4.4 Manage Employee Grievances

Single leaf L3 covering complaint resolution under a collective agreement, employment contract, or other employer-established mechanism. Accountable is HR Business Partner Manager. Legal is Informed rather than Consulted — engaged only on contested or high-risk grievances, the same escalation-only pattern established for separations in the Move-to-Exit value stream, since routine grievance handling does not require proactive legal review.

7.4.5 Monitor Legal and Regulatory Environment

Single leaf L3 covering awareness of applicable employment legislation, potentially spanning multiple jurisdictions or emerging regulatory areas. This breaks from the 7.4.1–7.4.4 cluster: it is compliance-infrastructure stewardship, not case-based employee relations work. Accountable is Director of HR Operations, with Legal Consulted on an ongoing basis given the subject matter.

PCF 7.7 — Manage Employee Information and Analytics

7.7.1 Manage Reporting Processes

Single leaf L3 covering employee-related reporting to management. Pure systems and data-reporting work with no case-based or design content — Accountable is HRIS Analyst, no split needed.

7.7.2 Manage Employee Inquiry Process

Single leaf L3 covering general employee inquiries and requests for clarification. This is the one L3 in this sub-domain that breaks from HRIS Analyst ownership: it is general employee-facing intake and support, not systems administration. Accountable is HR Generalist, consistent with the operational-delivery role pattern established in Reward-to-Retain; HR Business Partner Manager is Consulted for inquiries that escalate toward grievance-adjacent territory.

7.7.3 Manage and Maintain Employee Data

Single leaf L3 covering capture and maintenance of employee information. Clean systems-of-record work — Accountable is HRIS Analyst, no split needed, consistent with the same role's ownership of 7.2.5 and 7.7.1.

7.7.4 Manage Human Resource Information Systems

Single leaf L3 covering administration of HR information systems spanning HR, accounting, management, and payroll integration. Direct systems-ownership match — Accountable is HRIS Analyst.

7.7.5 Develop and Manage Employee Measures

Single leaf L3 covering performance, productivity, efficiency, and training metrics. Closest fit is HRIS Analyst given the absence of a dedicated analytics role in the catalog; Director of HR Operations is Consulted since these measures feed broader HR governance reporting.

7.7.6 Develop and Manage Time and Attendance Systems

Single leaf L3 covering systems for tracking work time, attendance, and related data. Direct systems-ownership match — Accountable is HRIS Analyst, no split needed.

7.7.7 Develop Workforce Analytics

Five L4 activities (determine stakeholder requirements, identify research questions, select analysis methodology, identify data sources, gather workforce data) form an analytics-development lifecycle. Accountable is HRIS Analyst, the closest available fit in the absence of a dedicated analytics role; Director of HR Operations is Consulted, since stakeholder requirements for workforce analytics typically originate from broader HR leadership.

7.7.8 Implement Workforce Analytics

Three L4 activities (transform workforce analysis data, develop insights, communicate outcomes) continue directly from 7.7.7's analytics-development work. Accountable remains HRIS Analyst for continuity; Director of HR Operations is Informed as the recipient of communicated analytics outcomes.

PCF 7.8 — Manage Employee Communication

7.8.1 Develop Employee Communication Plan

Single leaf L3 covering communication planning, including change-management framing and seeking employee input to decision-making. This is business-facing, change-adjacent planning work — Accountable is HR Business Partner Manager, with Director of HR Operations Consulted.

7.8.2 Conduct Employee Engagement Surveys

PCF 7.0 — Enable & Govern Value Stream

Role Assignment RACI — Reasoned-Match Methodology (Final)

Single leaf L3. This is the same functional activity as the Reward-to-Retain value stream's 7.5.5 (Manage/Collect Employee Suggestions and Research) — APQC names it separately under two different L2 groups. For consistency, the assignment carries forward unchanged: Accountable is HR Generalist, with HRIS Analyst Responsible for the data and survey-tooling side.

7.8.3 Deliver Employee Communications

Single leaf L3 covering implementation of the communication plan — the execution half of 7.8.1's design work. Accountable remains HR Business Partner Manager for message continuity, with HR Generalist Responsible for delivery execution.

Cross-Cutting Pattern

Enable & Govern is the first value stream spanning multiple PCF L2 groups rather than one, and its accountability pattern reflects that: three distinct role clusters emerge along the underlying group boundaries rather than a single dominant owner. HR Business Partner Manager owns the case-based, relationship-driven work (7.4.1–7.4.4, 7.8.1, 7.8.3); HRIS Analyst owns the systems and data infrastructure work (the majority of 7.7); and Director of HR Operations sits above both as the cross-domain governance layer, directly Accountable for compliance monitoring (7.4.5) and Consulted across several L3s in both other groups. This value stream also has the least L4 activity detail of any completed so far — 12 of 16 L3s are single-leaf entries with no L4 children — which means more of the reasoning here rests on L3-level description text than in prior value streams.

Scope and Methodology Notes

Every assignment in this document is grounded in real APQC L3 and L4 text rather than in process names alone, though the limited L4 depth in this value stream means more reliance on L3-level description text than in prior value streams. One L3 (7.8.2) carries forward an assignment established in a different value stream (Reward-to-Retain) due to a genuine content overlap in APQC's own structure. All sixteen assignments, including the Value Stream Owner selection, were confirmed through direct subject-matter review rather than accepted as a first-pass result. This completes role assignment for all five PCF 7.0 value streams under this methodology.
