9.0 — Manage Financial Resources

Human involvement H% at each of five HITL maturity levels · L3 Process → L2 Process Group → L1 Domain · Equal-weighted aggregation · Pattern types derived using HITL Verb Derivation Method from PCF Level 4 activities

Maturity Level	M1 Undesigned	M2 Emerging	M3 Defined ★	M4 Optimized	M5 Leading
Description	No intentional HITL design. AI tools exist but aren't systematically applied.	Tools selectively deployed. AI awareness growing. No systematic design yet.	Intentional HITL design applied. Pattern types classified. Decision rights documented.	AI mature across all patterns. Continuous improvement. Benchmarked against industry.	Maximum AI absorption with principled human oversight. Future state north star.

Maps every data entity each process Creates, Reads, Updates, or Deletes, and the system of record it lives in. Answers a different question than Process View (how much stays human) or People View (who's accountable): what actually gets touched, and where does it live. CRUD assignment is confirmed at L3 process granularity and inherited by L4 children, the same convention as RACI — never assigned independently per L4.
