

PCF 7.0 — HR Vision-to-Strategy Value Stream

Role Assignment RACI — Reasoned-Match Methodology (Final)

This document defines role accountability for PCF 7.0's Recruit-to-Hire value stream (7.1.1–7.2.5). Each L3 process is assigned a single Accountable role, with supporting Responsible, Consulted, and Informed roles, following standard RACI convention. Every assignment is grounded directly in APQC's Process Classification Framework v8.0 activity-level (L4) detail — the specific actions that make up each process — matched against the Organizational Role Taxonomy's documented role responsibilities. No assignment is inferred from process names or titles alone.

Where APQC's activity-level detail and the Taxonomy's role catalog together did not resolve to a single clean role (7.1.2, 7.1.4), two published external references were consulted as a supplementary check: SAP's HCM Organizational Management structure and SHRM's HR Competency Model. Neither is a titled-role responsibility catalog — SAP models system objects, SHRM models competency domains rather than job titles — so neither resolves role-level granularity on its own, but SHRM independently confirms that the functional domain boundaries used below are recognized industry-wide.

Accountability tier principle: Executive-tier Accountable ownership is reserved for L3 processes that constitute domain strategy formation itself. Processes that are strategy-adjacent — planning, monitoring, or administering a strategy already set — carry Director-tier Accountable ownership instead, with Executive-tier roles positioned as Consulted or Informed. Value Stream Owner accountability follows the same tier logic, with one standing exception: this rule was originally adopted to govern Operational-tier value streams, where ownership properly sits at Director tier since the stream aggregates a set of Director-scope L3 processes rather than a single executive decision. Strategy-tier value streams are the deliberate exception — a Strategy-tier stream is organized around the domain's Executive-scope strategy-formation L3 itself, so Value Stream Owner accountability sits at Executive tier, consistent with the same domain-strategy-formation logic that governs L3-level Accountable assignment above.

Every assignment below, including RACI splits and tier placement, was reviewed and confirmed through direct subject-matter review rather than accepted as a first-pass result.

Value Stream Owner: CHRO (Executive tier), consistent with the accountability tier principle above — HR Vision-to-Strategy is organized around 7.1.1, the domain's sole Executive-scope strategy-formation L3.

PCF	L3 Process	R — Responsible	A — Accountable	C — Consulted	I — Informed
7.1.1	Develop HR Strategy	HRBP Manager · Director of HR Ops	CHRO	Director of TA	All Managerial-tier
7.1.2	Workforce Planning/Policies	Comp & Benefits Mgr · HRBP Mgr · Dir. of L&D · HR Generalist	Director of HR Ops	VP People & Culture	CHRO · Director of TA
7.1.3	Monitor/Update HR Strategies	HRBP Manager	Director of HR Ops	VP People & Culture	CHRO · All Managerial-tier
7.1.4	Competency Management Models	Comp & Benefits Mgr · HRBP Manager	Director of L&D	VP People & Culture · CHRO	Director of TA

PCF 7.0 — HR Vision-to-Strategy Value Stream

Role Assignment RACI — Reasoned-Match Methodology (Final)

Accountable Assignment — Reasoning

7.1.1.1 Develop HR Strategy

All eight L4 activities (needs identification, role/structure/delivery-model determination, cost determination, HR measures, strategy communication, HR systems/technology strategy, employer branding, employee experience design) are foundational, organization-wide design work — none is specialist sub-function execution. CHRO is the only catalog role positioned above the functional Managerial tier to own architecture at this scope. HRBP Manager and Director of HR Ops are Responsible for the underlying analysis (needs identification, cost determination) that CHRO is accountable for as an output.

7.1.1.2 Workforce Planning/Policies

Of 16 L4 activities, only one (7.1.2.11, Administer HR policies) is operational; the remaining 15 split into recognizable specialist domains — compensation/rewards strategy, succession/leadership programs, DEI, program design, policy creation, workforce models, job architecture. SHRM's published competency model independently names several of these as distinct professional domains (Workforce Planning and Employment; Compensation and Benefits; HR Development), confirming the cluster boundaries are not arbitrary. Accountable is Director of HR Operations, not an Executive-tier role: per the standing architecture rule, Executive-tier Accountable is reserved for L3s that constitute domain strategy formation itself, as 7.1.1 does. 7.1.2's L4s are strategic *program design and administration* across specialist domains, not strategy formation, so Director-tier ownership is correct despite the cross-functional breadth. VP People & Culture moves to Consulted as the executive oversight party. Responsible remains distributed by cluster across Compensation & Benefits Manager, HR Business Partner Manager, Director of L&D, and HR Generalist.

7.1.1.3 Monitor/Update HR Strategies

All four L4 activities (measure realization of HR objectives, measure HR's contribution to business strategy, communicate plan updates, review/revise plans) are measurement-and-revision cadence work — categorically distinct from 7.1.1's design work, confirmed directly by the L4 text rather than inferred from the L3 name. Under the standing architecture rule, this is exactly the case the rule is meant to catch: monitoring and revising a strategy is not the same as forming one, so Accountable moves to Director of HR Operations rather than staying at Executive tier. VP People & Culture is Consulted as the executive who owns the strategy being monitored; CHRO is Informed.

7.1.1.4 Competency Management Models

Single leaf L3 with no L4 children, but its description explicitly spans employee development, career path, compensation policy, and performance management — the same multi-specialist texture as 7.1.2, just without L4 sub-activities to make the clusters visible in the source data. L3-level RACI splits (single Accountable, multiple Responsible by specialist cluster) are the expected real-org pattern for 7.1.2, 7.1.3, and 7.1.4 specifically, not a workaround for a catalog gap. Accountable is Director of L&D, consistent with the accountability tier principle that Executive-tier Accountable is reserved for domain-strategy-formation L3s only — competency modeling is capability architecture, not strategy formation. Responsible is split two ways across Compensation & Benefits Manager (comp-policy integration) and HR Business Partner Manager (career-path/business-planning integration); VP People & Culture and CHRO sit as Consulted.

Cross-Cutting Pattern

The four L3 processes in this value stream resolve into two accountability bands: Executive accountability (7.1.1 only, CHRO — reserved exclusively for the one L3 that constitutes domain strategy formation itself) and Director-tier accountability (7.1.2, 7.1.3, 7.1.4 — strategic program design, stewardship, and competency architecture that is strategy-adjacent but not strategy-formation). Value Stream Owner accountability sits at Executive tier (CHRO), consistent with the tier-ownership exception for Strategy-tier value streams: this stream is organized around the domain's one Executive-scope strategy-formation L3, so ownership sits at that same tier rather than aggregating downward to Director tier.

Scope and Methodology Notes

Every assignment in this document is grounded in real APQC L4 activity text rather than in process names alone. Two L3 processes (7.1.2, 7.1.4) required additional judgment beyond APQC and the Organizational Role Taxonomy, informed by SAP's and SHRM's published reference material — neither of which publishes role/title-level responsibility text at this granularity, but both were consulted as a supplementary check rather than a primary source. All four assignments, including RACI splits and accountability-tier placement, were confirmed through direct subject-matter review rather than accepted as a first-pass result. This value stream was carved out from the original Recruit-to-Hire value stream on July 27, 2026, in recognition that its anchor L3 (7.1.1) constitutes domain strategy formation and therefore belongs in a distinct Strategy-tier stream rather than bundled with Operational-tier recruiting execution — see the Recruit-to-Hire document (now scoped to
