

PCF 7.0 — Perform-to-Grow Value Stream

Role Assignment RACI — Reasoned-Match Methodology (Final)

This document defines role accountability for PCF 7.0's Perform-to-Grow value stream (7.3.1–7.3.4). Each L3 process is assigned a single Accountable role, with supporting Responsible, Consulted, and Informed roles, following standard RACI convention. Every assignment is grounded directly in APQC's Process Classification Framework v8.0 activity-level (L4) detail matched against the Organizational Role Taxonomy's documented role responsibilities. No assignment is inferred from process names or titles alone.

L3-level RACI splits (single Accountable, multiple Responsible by activity cluster) are used where an L3's activities span both program design and execution work — this reflects the real shape of how these processes typically operate, not a workaround for a gap in the role catalog. Where an activity is performed by a direct-report supervisor rather than an HR role (e.g., conducting a performance review), it is logged as an external participant — “Managers,” distinct from “Hiring Managers” — rather than force-fit to an HR title.

Every assignment below, including the RACI-split pattern and the external-participant category, was reviewed and confirmed through direct subject-matter review rather than accepted as a first-pass result.

Value Stream Owner: Director of L&D (Director tier), consistent with the accountability tier principle that Value Stream Owner accountability sits at Director tier rather than Executive — a value stream aggregates a set of Director-scope L3 processes, and Executive involvement at that level is Consulted or Informed oversight rather than direct accountability. Director of L&D is the natural fit here, already Accountable for two of the four L3s below.

PCF	L3 Process	R — Responsible	A — Accountable	C — Consulted	I — Informed
7.3.1	Manage Employee Onboarding	—	Onboarding Coordinator	Director of HR Ops	HRBP Manager
7.3.2	Manage Employee Performance	HR Generalist (documentation) · Managers* (review conduct)	HRBP Manager	Director of HR Ops	CHRO
7.3.3	Manage Employee Career Development	HRBP Manager (guidelines/succession) · L&D Specialist (skill execution)	Director of L&D	VP People & Culture	Director of TA
7.3.4	Develop and Train Employees	Director of L&D (strategy) · L&D Specialist (execution)	Director of L&D	HRBP Manager	CHRO

**Managers (direct-report supervisors) appear directly in the underlying APQC L4 text (e.g., conducting performance reviews) but are not a titled role in the current Organizational Role Taxonomy catalog. Confirmed as a standing external-participant category alongside Hiring Managers, first flagged in the Recruit-to-Hire RACI.*

PCF 7.0 — Perform-to-Grow Value Stream

Role Assignment RACI — Reasoned-Match Methodology (Final)

Accountable Assignment — Reasoning

7.3.1 Manage Employee Onboarding

All three L4 activities (develop onboarding program, implement onboarding program, monitor/update onboarding program) form one coherent full-lifecycle function that maps directly to a named title already in the Taxonomy catalog. No split — this is the cleanest single-role match in this value stream, equivalent in kind to Recruit-to-Hire's Recruiter and HRIS Analyst matches.

7.3.2 Manage Employee Performance

Of four L4 activities, two are program design/stewardship (“Define employee performance objectives,” “Monitor and update performance program”) and fit HR Business Partner Manager's business-facing administration role. “Review employee performance” is, in the overwhelming majority of real organizations, conducted by the employee's direct manager rather than HR staff — that is an external participant, not a role in the current catalog, following the same pattern as Hiring Managers in 7.2.3. “Document employee performance” is administrative record-keeping, assigned to HR Generalist. Accountable remains HRBP Manager as the process owner even though the review itself is executed outside HR.

7.3.3 Manage Employee Career Development

Of four L4 activities, “Define employee development guidelines” and “Establish succession plans” are guideline-setting work naturally paired with HR Business Partner Manager's cross-functional remit; “Develop employee career plans and career paths” and “Manage employee skill and competency development” are core Learning & Development execution. Accountable is assigned to Director of L&D since three of four L4s (career plans, skill development, and the development-guidelines framework itself) sit within L&D's natural scope. Worth noting explicitly: this L3's succession-plan activity (7.3.3.4, “Establish succession plans”) was confirmed distinct in scope from 7.1.2.3's “Develop succession plan” — the former is individual/role-level succession execution as part of a person's career development, the latter is organization-wide succession strategy design. Different granularity, not a duplicate, confirmed by direct comparison of the two L4 descriptions rather than assumed from similar naming.

7.3.4 Develop and Train Employees

The largest L3 in this value stream at seven L4 activities, spanning strategic alignment (align organizational development needs, define competencies/skills, align learning programs, analyze training needs) through direct execution (conduct training programs, manage examinations/certifications, monitor/evaluate learning programs). Director of L&D is Accountable and retains Responsible on the strategy-tier activities; L&D Specialist is Responsible on the execution-tier activities. This mirrors the design-versus-execution split pattern used for multi-activity L3s elsewhere in this framework, applied here to a Managerial/Operational pairing rather than an Executive/Managerial one.

Cross-Cutting Pattern

Perform-to-Grow's four L3 processes split into two accountability bands: Operational single-ownership (7.3.1, Onboarding Coordinator) and Managerial design-and-execution pairs (7.3.2–7.3.4, each Accountable to a Managerial-tier role with Responsible split across a mix of Managerial, Operational, and external-participant contributors). No Executive-tier accountability appears in this value stream, consistent with its nature as ongoing talent-development delivery rather than organization-wide strategy design.

Scope and Methodology Notes

Every assignment in this document is grounded in real APQC L4 activity text rather than in process names alone. No L3 in this value stream required external reference material beyond APQC and the Organizational Role Taxonomy. All four assignments, including the RACI-split pattern and the external-participant category, were confirmed through direct subject-matter review rather than accepted as a first-pass result. This same methodology will be applied to the remaining PCF 7.0 value streams and future domains.
